

# 9th International Workshop on Non-Neutral Plasmas

Columbia University  
June 16-20, 2008

The 9th International Workshop on Non-Neutral Plasmas will take place at Columbia University, in New York City, from June 16-20, 2008.

The workshop will be in the spirit of the previously very successful workshops in this series held in Århus, Denmark (2006), Santa Fe, NM (2003), San Diego, CA (2001), Princeton, NJ (1999), Boulder, CO (1997), Berkeley, CA (1994), Irvine, CA (1992), and Washington, D.C. (1988), and it will cover a large range of interconnected topics including:

- Confinement and dynamics of NNP
- Antiparticle plasmas and antimatter
- Strongly coupled plasmas
- Accelerator physics
- AMO physics, including quantum information
- Dusty plasmas

Invited speaker nominations should be forwarded to the Chair of the Program Committee, Prof. Matthew Stoneking, [matthew.r.stoneking@lawrence.edu](mailto:matthew.r.stoneking@lawrence.edu), by March 15. Please include a short description of the proposed topic and a paragraph describing why this would be a good invited talk. Invited speakers will be selected and contacted by April 1. In addition to the invited speakers, there will be a large group of speakers selected from the submitted abstracts after the deadline of April 18, 2008.

Detailed information about registration, accommodation, etc. for the workshop is now available on the workshop web-site.

Thomas Sunn Pedersen  
Chairman of the workshop  
212-854-6528

## Important Dates

- **Registration: April 18, 2008**
- **Bank transfer: April 18, 2008**
- **Abstracts: April 18, 2008**
- **Proceedings: August 1, 2008**
- **Accommodation: Please book your accommodation as soon as possible.**
