## Messages

I remember Jimmy fondly. He was so upbeat and encouraging. He really helped lift up spirits for us all and for me. He is a great individual. I wish Jimmy the best in his new endeavors in retirement.

**Christine Kostek**

STG Sales Support and Education - WW Benchmark Centers

---

Jimmy was a dear friend when I graduated from the Plasma Lab in 1980. He is also a fellow Greek. I regret not being able to attend. Please give him my best wishes.

**George Georgiou**

---

Wish I could be there! All the best to Jimmy!

**Hubert Burke**

---

I have happy memories of Jimmy and hope he has a very enjoyable retirement.

**Alban Deniz**

Baker Research, Ltd.

---

I had very positive experiences in the Applied Physics Lab and really appreciated Jimmy.

**Mikhail Klassen**

---

Jimmy did a great job running the Applied Physics Lab, and I am certain his cheerful presence will be sorely missed.

**Jeremy Hanson**

## Mesaages

Dear Jimmy,

It's been an amazing 30 some years: a time for sharing day-to-day experiences, for enjoying holiday and special celebrations, and for growing up, older and maybe even wiser together! You said, that although you're leaving, your heart is still here. That's truer than you know, in that your presence will be felt in the department for as long as we're here to remember.

Jimmy, I will truly miss your smile and your cheerful "Good Morning Ladies." Your generous good spirits provided a lift to the whole day.

I wish you all the best now. Saying "now that you're retiring" doesn't quite fit, because I know you have so many interests to pursue – on your own and with your family. I trust the coming years will be interesting, fulfilling, and joyful.

Thank you for including me in your circle of friends at Columbia. We will all miss you and remember you as the exceptionally kind and special person that you are.

With warm regards,

**Marlene Arbo**

---

Dear Jimmy,

You'll never know how much you will be missed, Jimmy. Thank you for being such a warm, caring, and kind colleague. I feel blessed to know you.

Have a wonderful time enjoying your family and friends. Please come back to visit often!

Fondly,

**Christina Rohm**

---

Dear Jimmy,

It hardly seems possible that you are retiring—much less for the second time! Even though we haven't worked together for a few years now, I do value your friendship very much. Your thoughtfulness and good cheer are appreciated, I think, by many besides me.

Please accept my best wishes for a very happy and healthy retirement and do keep in touch,

**JoAnn Winsten**

## Mesaages

Dear Jimmy,

Here's wishing you a very comfortable, serene and healthy Retirement in the years ahead. Your good works during a tenure of 50 Years at columbia is as good a legacy as any.

Your friendly persona and cheery greetings will be surely missed. Enjoy every day to the fullest, you certainly earned it.

Good luck.

**Walter Khan**

Mechanical Engineering Department

---

Dear Jimmy,

It is with fond memories of the applied physics lab class and all of our interactions over the past many years that I say you will be sorely missed by all of your many friends at the plasma lab. Please take care in the future and enjoy your well-deserved full retirement from the Department of Applied Physics and Applied Mathematics!

Best,

**Dave Maurer**

---

Jimmy,

Your warm smile and cheerful voice made Monday mornings a lot less dreary.

Your Friend,

**Nick**

---

Dear Jimmy,

It's been brief, but it's been a pleasure knowing you!

**Dina Amin**

## Mesaages

Dear Jimmy:

Thank you so much for your many years of being part of our department!

Many, many hundreds of students grew professionally due to their interactions with you in the lab.

For me, much of the fun in teaching applied physics lab was working closely with you every week!

Best,

**Irving Herman**

---

Dear Jimmy,

Working with you (for more than 24 years!) is one of the very best memories of my time at Columbia.

I am grateful for your professional help, your incredible sense of responsibility, your dedicated and patient tutelage of our students, and the many times your technical insights and advice have saved the day in our lab!

More than anything else, I will miss our weekly chats and time to talk about everything under the sun (and also about everything inside the sun, like fusion energy!!)

You have always been more than a colleague to me. You've also been (and will always be) a very good friend.

Very best wishes to you and your family!

**Mike Mauel**
